### Ledgers Integration

We don't try to re-invent the wheel, and since there are many good accounts suites out there (you're probably using one yourselves) we don't write our own ledgers. Instead we provide interfaces into popular accounting systems, the advantage of this is that you don't need to change your accounting system if you become a SM user.

### Key Features

- Import customers and suppliers from your ledgers into SM
- Credit-check customers at the point of entry of a sale or enquiry, and optionally at despatch as well; invoiced-debt and optionally the value of outstanding sales can be compared to customers' credit-limits
- Post sales- supply- and subcontract-invoices directly to your ledgers: no duplicate entry needed

We are certified as a Microsoft Small Business specialist and have proven experience providing Microsoft products, services and solutions for your small business.

If you have any requirements for OpenEdge ABL development we have the experience. Advanced GUI for .NET, AppServer and other OpenEdge technology expertise available.
